

FINUX

Future Internet Network for Universal Assets

Deposit • Rewards • Referral • Clubs • LP Benefits

Description

FINUX is a decentralized crypto ecosystem built for sustainable, long-term passive income. It allows users to participate through secure wallets, token staking, and liquidity pools, without complex technical barriers.

Users begin with a small deposit, after which FINUX tokens are minted automatically and credited to their wallet. By staking FINUX or providing liquidity alongside stablecoins, users earn daily rewards in a transparent and automated way.

To protect the ecosystem, FINUX uses built-in stability mechanisms such as liquidity pairing, reward limits, and token burning during withdrawals. This helps control supply and encourages long-term participation rather than short-term speculation.

Community growth plays an important role, with structured referral and club incentives that reward active contribution and leadership.

Overall, FINUX combines technology, transparency, and community to create a fair and sustainable crypto earning ecosystem.

What is FINUX Mining Project?

- A decentralized reward system powered by FINUX token
- Staking, LP, referrals & club rewards

Unique crypto identity

Fuel ecosystem growth

A strong user networking

Fair reward mechanisms

Wallet & Security

- System-generated wallet
- Private key / seed phrase must be secured
- Company not responsible for loss

Step 1: Wallet creation

➔ Download wallet

➔ User must secure private key

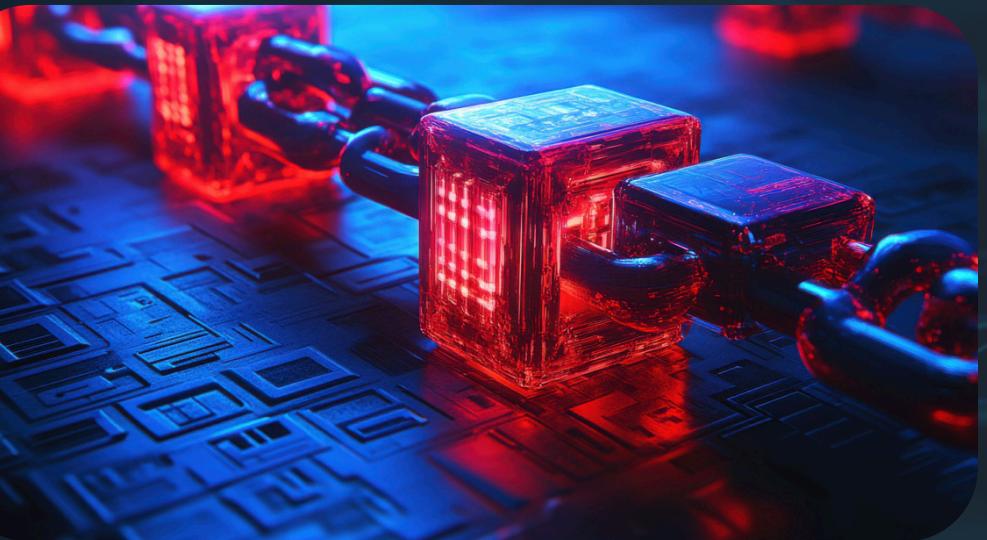

➔ User signs up on DEX

Free Airdrop Rewards

Referral Airdrop
Get 50 YDX on a minimum of 5 direct paid referrals

Step 2: Minimum Deposit & Structure

➔ Accepted: \$20 / \$50 / \$100
/ \$200 / multiples of \$100

➔ Minimum Deposit: \$20

➔ Deposit Split:
30% MSTC + 70% USDC.e

Step 3: Transaction Completion

Minting Process

→ After deposit, system mints one new FINUX coin

→ Minted FINUX coin auto-credited to user wallet
